AUTO-MATE™

PETROL FORECOURT BIN

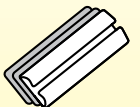

3 Functions
In One

1 A Litter Bin

2 A Towel Dispenser

3 A Glove Dispenser

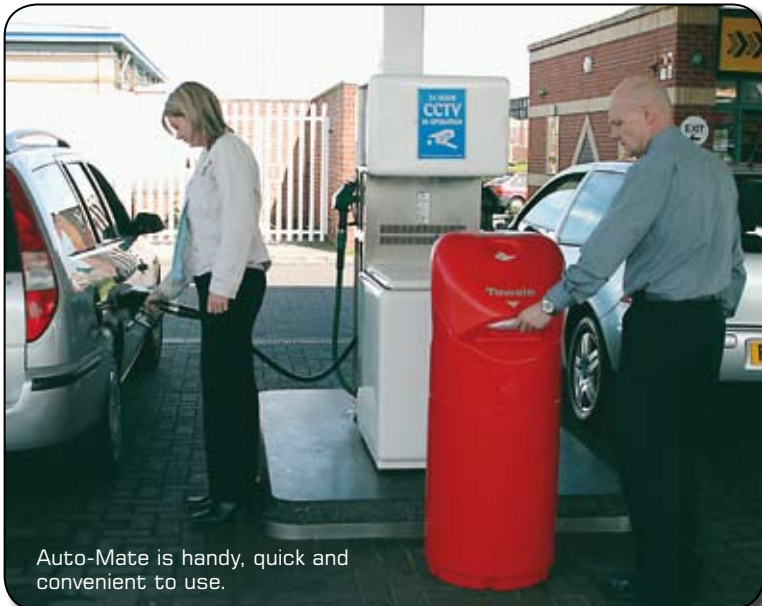

3

Functions In One

Auto-Mate™ holds and dispenses **plastic gloves** and **paper towels**, whilst also functioning as a **litter bin**.

Manufactured from **Durapol®**, **Auto-Mate** is easy to clean, it will not chip, rust or corrode and is self-coloured.

Auto-Mate has a smooth contoured, slimline shape with a stylish, modern appearance. It offers many user-friendly features and benefits. **Auto-Mate** is aesthetically pleasing and designed specifically to be sited at petrol pumps. Its compact design makes the unit ideal for busy customer and working environments.

Auto-Mate is handy, quick and convenient to use.

1

LITTER

Collection

Litter Aperture

Two large litter apertures are positioned either side of the bin. They are clearly visible to allow easy recognition, and encourage the user to deposit litter.

Optional Key Lock

There is an optional key lock location on the centre of the bin to allow the hood to be locked to the main body, preventing the hood being stolen or vandalised. It also reduces the possibility of misuse of the unit resulting in litter spillage.

Removable Lid

The lid of the unit is removable to allow for thorough cleaning and easy removal of litter. Drainage channels within the lid allow excess water to disperse easily, minimising the risk of the towels becoming wet.

2 TOWEL

Dispensing

Disposable Paper Towels

Auto-Mate takes one pack of towels (c-folded are recommended) (quantity approximately 150) size 105 x 237 x 120mm.

JUST ONE TOWEL EACH TIME

Ballast Weight holds Towels

A ballast weight inside the hood keeps the towels in position for efficient use, preventing them being pushed up and back into the bin unit.

The towel aperture is clearly indicated by an arrow for ease of use. Forecourt customers are able to wipe clean any spillages when filling up with fuel. The unit dispenses one towel at a time.

3 GLOVE

Dispensing

Disposable Polythene Gloves

Auto-Mate takes one pack of 100 ambidextrous gloves, size 175 x 155 x 15mm.

Hinged Glove and Towel Cover

Auto-Mate has a hinged glove and towel cover to help protect them from the weather. It also allows for quick and easy refilling and easy access for cleaning the inside of the hood.

Twist Lock

A twist lock fitted to the glove and towel cover helps to prevent misuse and increases the protection of the gloves and towels from the weather.

Auto-Mate can be refilled with gloves and paper towels quickly and easily. Please turn to the back page for more details.

Auto-Mate is quick and easy to refill...

1. Unlock the cover and lift the lid to reveal the interior.

2. Lift and push the towel ballast plate back up into the body.

3. Refill with new towels.

4. Remove the empty glove box.

5. Refill with new glove pack.

6. Close lid and activate the lock.

Personalisation

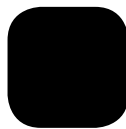

Auto-Mate has large areas for personalisation with corporate names and logos. Please telephone 01253 600413 to discuss your requirements.
