Food Waste Recycling? Glasdon are Here to Help!

Over the years, Glasdon has been a pivotal partner for numerous businesses and councils in addressing the critical challenge of food waste management. Recognising the diverse needs of various sectors, Glasdon has pioneered bespoke solutions that are both efficient and environmentally sustainable. Their innovative approach encompasses the design and implementation of specialised food waste bins, tailored to meet the specific requirements of different environments, including multi-occupancy buildings.

If you are experiencing issues with food waste collections, Glasdon is here to help. Whether you are a business looking to streamline your waste disposal processes or a council aiming to improve community recycling efforts, Glasdon offers the tools and support necessary to achieve your goals.

Don't let food waste management challenges hold you back - contact Glasdon today to discover how our bespoke solutions can transform your waste collection strategy.

Nexus® Stack Recycling Bin

Glasdon Jubilee™ City 100 Food Waste Recycling Bin

The Glasdon Jubilee™ City 100 is a highly innovative food waste recycling unit, engineered to make regular food waste collections faster, easier, and more efficient. The compact unit is capable of collecting up to 100L of waste and is designed to serve both the public and the collection teams who empty it regularly.

For users, convenience is built in: the lift-up flap is smooth and simple to operate, while an optional foot pedal can be selected that allows waste to be deposited hands-free.

From an operator's point of view, the benefits are immediate. The small footprint makes it ideal for busy, narrow pavements, while Glasdon's unique liner and door system ensures quick, no-fuss emptying with standard mechanical-lift equipment. The 100L wheeled liner is equipped with a new unique slam-lock system, so servicing is fast, reliable, and hassle-free - keeping crews moving and collections on schedule.

The unit is compliant with the critical elements of the BS EN 840 standard for mechanical lifting systems.

The 100L capacity caters to a minimum of 15 flats based on a weekly collection of a full 7L food waste collection caddy. However, weekly food waste volumes can vary meaning that in most cases the bin will serve 30 or more flats.

Glasdon Pledge to Reach

Net Zero

By 2035

Find out more...

As a Company with a commitment to continuously improving our environmental performance, we are pleased to announce that in 2021 we pledged to reach Net Zero by 2035 (with Scope 1 and 2* to be achieved by 2025).

*The Green House Gas Protocol Corporate Standard classifies a company's GHG emissions into three 'scopes'. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.
