OUTDOOR LITTER BINS

We have a massive selection of litter bins in a vast array of colours and capacities. You will be sure to find the correct one for your purpose. All our litter bins are easy to clean and never need painting, giving you an attractive and highly functional waste container for many years.

Sherwood™ Litter Bin

Glasdon Jubilee™ 110 Litter Bin

Curve Appeal for Your Waste Management... the Elipsa™ Litter Bin

Offering a contemporary style, the Elipsa litter bin's slim and compact design makes it an ideal solution for busy public environments.

Its curved hood prevents litter from being left on top of the bin, as well as providing cover from the elements, which helps keep public locations tidy and free from unsightly, overflowing litter.

Designed with a double-sided aperture and oval footprint, the Elipsa provides ease of access with minimal obstruction on pavements to enable quick and easy disposal of waste.

To reduce lifting and manual handling, the Elipsa litter bin features a lift-off body with a dedicated base plinth. A keyed twist-locking system secures the body to the base of the container.

WHEELIE BIN SCREENS & BIN HOUSINGS

These outdoor wheelie bin screens and housing systems are designed for both on-street locations and outdoor recycling centre usage at workplaces, schools, restaurants and bring sites. Our robust screen systems are ideal for hiding unsightly, large-capacity outdoor wheelie bins to create a clear, attractive recycling station.

The Modus™ Delivers for Gravesham

Securely containing large capacity wheeled bins, the bin housings collect sizeable amounts of waste while reducing the possibility of contamination. Exceptionally strong and weather-resistant, the Modus™ 1280 general waste housing adds to Gravesham Borough Council's corporate plan: 'Delivering a Gravesham to be proud of'.

The council chose the Modus housing range as it answered their need for proactive waste management. By personalising four Modus 1280 general waste housings and two Modus 1280 recycling housings with vinyl wraps of several of the borough's landmarks, we helped provide an attractive and efficient waste solution.

Modus™ Housing

INDOOR LITTER BINS

We produce an extensive range of indoor litter bins made from highly durable materials to ensure a functional and long service life. Our collection of contemporary and stylish internal litter bins is ideal for inside most environments, complementing the surroundings.

Envoy™ Litter Bin

Tweed™ Litter Bin

INDOOR RECYCLING BINS

We design and manufacture a wide range of indoor recycling bins. Our recycling containers are available in a large selection of styles, materials and capacities to suit your requirements. Apertures and graphics are available for various waste streams, which allow you to manage recycling waste more effectively.

NEW Nexus® Stack Recycling Bins

Sort Waste & Save Space with New Stackable Recycling Bins

The compact design of the Nexus® Stack recycling bins makes them ideal for using indoors where space may be limited, but the commitment to recycling and caring for the environment is great.

As recycling and waste management needs differ in the home and from one organisation to another, this new range of stackable bins offers all customers the total flexibility to create a waste sorting and recycling system they need.

The idea is that, in just a couple of easy steps, the customer can create a Nexus Stack system for the number of waste streams and types of waste they need to sort by choosing the aperture styles, colours and graphics that can help everyone improve their recycling.

Plus unlike other systems, each Nexus Stack unit contains a removable tilt bin which makes it quick and easy to empty and clean without the need to dismantle any of the stacking unit at all.

C-Thru™ 5L Battery Recycling Bin

NEW Nexus® Style Range

The Nexus Style is a premium finish internal litter and recycling bin aimed at offices and commercial environments that has the ability to accept vinyl wraps on the door to match interior décor.

Manufactured from an Armortec® coated steel frame and Vandalex® aluminium door extrusion, the Nexus Style combines functionality and strength with contemporary styling. The unit is designed for single-sided use featuring front door operation and a flat back. The Armortec-coated steel frame and bin body panels are 100% recyclable, making the Nexus Style recycling bin an environmentally friendly indoor recycling container.

The Nexus Style recycling bin has a striking design that provides a long service life and requires minimal maintenance. The Vandalex door has an anodised and polished Nexus Style Smoke Grey finish, contrasting with the Armortec-coated metallic grey steel frame to create an attractive, modern appearance. The smooth door offers a large surface onto which a collection of full vinyl wraps can be added to create a custom look.

If you wish to find out more about the graphic options available for the Nexus Style range or would like to see how your chosen product would look with custom graphics before ordering, please request a quote today.

New eBook dispels recycling myths and helps create a successful recycling programme

In response to the recent COP26 climate goals, the next eBook in the Glasdon series provides the necessary information to action a successful waste management programme.

With the urgency surrounding sustainability and the global impetus that's building to mitigate the negative impacts of climate change, the eBook provides the means to better equip workplaces, businesses, and individuals to participate in the fight for a greener future.

Find out how to:

- Identify and manage specific waste streams
- Recognise what can be recycled (and what can't)
- Create a successful recycling programme that meets the needs of your workplace or organisation
- Unlock the financial and business benefits of recycling

Divided into two sections - 'Recycling for a Greener Future' and 'The Practical Guide to Creating a Successful Recycling Programme' - the guide covers the reasons for recycling, the advantages of a recycling programme, and a step-by-step guide of how to create a successful and cost-effective scheme.

The eBook is free to download on www.glasdon.com

CUP RECYCLING BINS & STATIONS

The Glasdon cup recycling bin range has been designed to help you implement an efficient cup recycling programme and increase your cup recycling rates. Choose from our selection of specifically designed cup bins and cup recycling stations which feature liquid reservoirs and separate compartments for cups and lids.

Nexus® Cup Stacker

Premier League Clubs Kick-Off #PassOnPlastic Campaign with help from Glasdon Cup Stackers

Premier League football clubs join forces with Sky Ocean Rescue in #PassOnPlastic campaign, with our cup stackers to help kick-start the clean up!

Fulham FC, Chelsea FC and Manchester City FC all required a compact and cost-effective solution for recycling cups in their stadiums, which Glasdon could provide.

The Nexus Cup Stacker was selected as the cup stacker to trial ahead of the new season, with wall- and fence-mounted cup stackers with personalised graphics for Fulham, Chelsea and Manchester City.

We're extremely proud to be supporting the Football Clubs in their #PassOnPlastic Campaign and that our cup stackers are being used to phase out single-use plastic from their stadiums.

FOOD WASTE RECYCLING BINS

Our food waste recycling bins are ideal for kitchens, canteens, food courts and any other areas where food is prepared or consumed. The easy-to-use bins make food waste disposal hygienic and efficient and they are a good way of handling high volumes of food waste.

Combo™ Tray Shelf Catering Waste Bin

Nexus® Shuttle Food Waste Bin

TRANSPARENT RECYCLING UNITS

We have a selection of recycling units that are ideal for use with transparent sacks to enable maximum visibility of the contents deposited. This helps avoid the risk of cross-contamination.

C-Thru™ 180 Recycling Bin

Orbis™ Sack Holder

Orbis Sack Holder

Latest Glasdon Product Meets National Security Guidelines

Designed to comply with national security guidelines, the TSU™ (Transport Security Unit) sack holder is the ideal paper and non-recyclable combined waste solution for transport and leisure locations.

Featuring two easy access apertures with a large capacity for clear waste sacks, the TSU sack holder enables high visibility alongside durability and vandal resistance. The TSU wall-mounted model also achieves a 3-star blast test performance rating, ensuring safety in areas where security is paramount.

The TSU sack holder's clearly designated and colour-coded apertures make waste sorting simple at point of entry by way of both colour and shape. Used papers are inserted into the front, slim aperture, whilst non recyclable waste collects in the rear, larger aperture.

Nexus® Evolution City Recycling Bins

Nexus Evolution City is a versatile solution for outdoor recycling in public environments.

The Nexus Evolution City is a stylish and robust multi-stream recycling unit, offering complete flexibility to meet the exact requirements of any recycling scheme. Hooded aperture options mean the model offers a durable recycling solution for outdoor environments whilst coordinating with others in the Nexus Evolution range.

Entirely customisable from aperture colour to waste stream, graphics are easily applied onto either of the large sides for added personalisation. A narrow footprint ensures minimal floor space is required, whilst the symmetrical design allows the product to be approached from all sides in open spaces.

A hooded aperture provides added security, resistance to the effects of bad weather, and anti-vandalism protection. Manufactured from recyclable Durapol® material for a long service life, the Nexus Evolution City will not chip or rust and is easy to clean.

Neil Gilkes, Sales Manager for Glasdon UK Limited, said:

“We’re very excited about the launch of Nexus Evolution City. It provides a flexible recycling solution, built to withstand the harsh outdoor conditions whilst maintaining the versatility of the internal Nexus Evolution recycling unit. It’s a great addition to our selection of outdoor recycling products. With so many flexible options, our customers can choose their own configuration, colours and graphics to best fit their needs.”

OUTDOOR RECYCLING BINS

We produce an extensive range of outdoor recycling bins of the highest quality, in both traditional and contemporary designs. All of our recycling containers are designed to be hard-wearing and long-lasting and feature easily identifiable graphics to make recycling easy.

Nexus® 200 Recycling Bin

Glasdon Jubilee™ 110 Recycling Bin

Nexus® City 240 Recycling Bin

Electra™ Curve Recycling Bins

The Electra Curve recycling bin provides a new aesthetic to the range with its unique curved hood design.

Available with a 60 litre or 85 litre capacity, the open aperture for the disposal of waste ensures the bin is easy to access with a curved hood to provide cover and avoid overflowing of the inside contents. The curve also prevents litter from being placed and left on top of the bin.

The Electra Curve range also features recycling bins with a choice of 4 dedicated aperture panels available to suit your requirements.

Electra™ Curve 60 Recycling Bin

Electra™ Curve 85 Recycling Bin

SEATING

We offer a range of traditional and contemporary seating which can be used both indoors and outdoors. These seats and benches are low maintenance, weather and vandal resistant. They will add comfort and style around your environment.

Pembridge™ Picnic Table

Raise the Eco-benchmark with Recycled Material Seating Solutions

As consumers, and particularly since the pandemic began, more of us than ever before are actively seeking out eco-friendly products and sustainable brands and businesses.

However, when buying on behalf of the business, organisation or community, there is inevitably more pressure to make sure that the quality and sustainability of the products we choose stand up to their environmental credentials.

Sustainable by Design

So what is a Glasdon recycled material seat actually made from?

Our specially formulated Enviropol material is not only manufactured with 100% recycled plastic, it is also 100% recyclable at the end of its service life. Enviropol is predominantly produced from post-consumer polyethylene and polypropylene, made up of carrier bags, pots, tubs and trays, a large majority of which are single-use plastics.

As an example, the Enviropol seating slats on the Glasdon Pembridge™ Picnic Table could contain as many as 102,420 recycled bottle caps!

The benefits of using Enviropol also go further than its circular economy based credentials and are integral to its real-world sustainability. The density, strength and weather resistance of Enviropol will ensure a long, virtually maintenance-free service life. It is self-coloured (available in either brown or black) and, unlike wood, needs no painting or surface treatment ever. The material is resistant to chemicals and impervious to water, frost and most corrosive substances.

Glasdon helps #KeepBlackpoolTidy in Gateside Park Revamp

Blackpool Council, supported by Wilko, teamed up with Keep Britain Tidy as part of their Great British Spring Clean. As part of this partnership, Keep Blackpool Tidy supported a local project to revamp a Blackpool park.

Gateside Park had already included a few Glasdon products so, wanting to continue with further use of our products, the community project officer visited Glasdon to discuss introducing one of our newest products to the park.

This resulted in an order for a number of **Lowther Seats** for the park, featuring Enviropol slats. Our **Pembridge™ Picnic Table** (see page 22) was also selected with a version for Wheelchair Access for a more inclusive seating solution.

To match the environmentally friendly aesthetic, **Enviropol 100 litter bins** were ordered for the community to dispose of their litter to help #KeepBlackpoolTidy.

Enviropol® 100 Litter Bin

WATER SAFETY EQUIPMENT

Glasdon is a market leader in the manufacture and supply of life-saving water safety equipment. The range includes 24" and 30" lifebuoys with 30m and 50m throwing ropes, lifebuoy housing units, the B-Line™ throw line rescue buoy, and equipment storage units.

Glasdon lifebuoys are fully compliant with Chapter III standards for life-saving devices, as per the Life-saving Appliance (LSA) code (SOLAS, 1974).

SMOKING CONTROL

We're here to help you keep cigarette waste under control on your premises with a wide range of quality, hard-wearing smoking bins. The Glasdon collection offers everything from free-standing ashtrays and cigarette bins to wall-mounted ashtrays.

Ashguard SG™ Cigarette Bin

Integro City™ Cigarette & Litter Bin and Ashmount SG™ Cigarette Bin

How Do I Choose a Cigarette Bin?

There's so much choice when it comes to cigarette bins that it can be hard knowing which cigarette bin is best for your site.

FAQ: What size cigarette bin do I need?

Ranging from 1.5 litre to 35 litre capacities, we are confident that you can find a Glasdon cigarette bin to meet your needs. The required size of your cigarette butt container can be determined by various factors including how busy the environment is, how frequently the unit will be emptied and how often the ashtray terminal will be used.

FAQ: How much maintenance is required?

Thanks to their durable construction and vigorous product testing, Glasdon cigarette disposal containers offer a long-service life and require minimal maintenance. We still recommend planning frequent maintenance inspections to ensure the products are in safe, useable condition at all times.

FAQ: I'm worried about fire risks...what can I do?

All of our smoking control products are designed and vigorously tested to reduce the risk of fire propagation. Glasdon cigarette bins feature small grille openings to prevent the deposit of any waste streams other than cigarette butt litter.

The **Ashmount SG** and **Ashguard SG** are both fitted with **SmokeGuard™** technology. SmokeGuard is a unique smoke-dampening device located underneath the stubbing grille and within the liner. SmokeGuard minimises the amount of smoke released to reduce the chance of a fire propagating inside the cigarette bin in the unlikely event of a fire.

If you are still worried about fire risks, we recommend creating a designated smoking area and placing instructional signage near to outdoor ashtrays to remind smokers of correct usage and behaviour.

SHELTERS

Glasdon have over 30 years' experience in the manufacturing of prefabricated canopies, shelters and commercial bike storage facilities.

Carleton 50™ Smoking Shelter

Eclipse™ Back-to-Back Canopy

Catch wind of Glasdon's latest shelter: Echelon

Glasdon's multi-purpose solution makes choosing your next shelter a breeze.

With a modern yet functional and cost-effective design, the **Echelon™ Shelter** is delivered fully assembled and ready for immediate installation.

The Shelter's robust, Armortec® coated mild steel frame is resistant to corrosion and vandalism, whilst UV protected, curved, clear polycarbonate panels provide excellent overhead cover. These high-quality materials ensure Echelon requires minimal maintenance throughout its long service life.

Optional 'toast rack' stands are available for up to 10 bicycles, as well as polycarbonate end panels, which provide further protection from the elements. The Echelon Shelter has been thoroughly tested by a structural engineer to ensure it is able to withstand strong wind and harsh weather conditions. Typical uses include cycle, smoking and waiting shelters.

Aero™ Smoking Shelter

Echelon Cycle Shelter

BOLLARDS & POSTS

Our bollards and posts are available in a variety of traditional or modern styles and can be used for access control, verge protection, and as delineators to identify parking restrictions.

Cyclmaster™ Bollard

Cyclmaster™ Bollard – Leading a New Generation of Cycle Route Bollards

In recent years there has been a significant increase in the volume and scale of infrastructure schemes aimed at providing safer routes for cycling and walking to promote active travel. An effective way to segregate cycle lanes or shared-use pavements to make them safer has been to physically separate more vulnerable road users from dangerous conflict areas.

With these infrastructure changes, a new generation of bollards are necessary that have the capability to display highly visible information such as warnings, direction and instruction to cyclists and road users.

Glasdon have launched a bollard ideal for marking cycle routes with its highly visible display signs. The **Cyclmaster bollard** is a cycle route marking bollard that features sign-carrying and directional faces providing visual conspicuity of cycle lanes.

These signs are designed to warn, inform and protect cyclists and pedestrians, with the double-sided bollard able to offer a large sign area on the front and rear so directions are visible from both sides.

For optimum visibility, the sign area features a large fluorescent yellow retroreflective panel as standard. Sign faces can be displayed on top of this panel or on their own. To protect the retroreflective panels and signs, the sign area is recessed to avoid vandalism and minimise damage in the event of a collision.

Featuring a slim footprint, the Cyclmaster is designed so it can be situated in narrow spaces, such as pavements and segregated cycle islands, or bolted into a concrete foundation without taking up valuable space for cyclists or pedestrians.
