Simpler Recycling

How Is Your Business Affected?

With the introduction of the new government initiative regarding waste separation and collection for England, businesses may still be struggling to conform to the new rules that have been introduced. However, as Douglas Adams famously reminded us, 'Don't Panic.' It's not as bad as it sounds. In fact, things are only getting simpler.

Separating waste can be a complex and time-consuming process, especially when dealing with multiple waste streams. Fortunately, the new initiative simplifies this process.

What Will Be Collected?

The legislation will make the regular collection of six types of waste mandatory.

Types of waste:

- Paper and Cardboard
- Glass
- Food Waste
- Plastic (including plastic film from 2027)
- Metal
- General Waste

Households benefit from regular, free waste collections for all applicable waste types, as organised by councils and local authorities. However, businesses are responsible for their own waste disposal, which may incur costs and require arrangements with private waste collectors.

Household waste collections will occur at stipulated dates and regular intervals, often depending on each local authority. Businesses, on the other hand, are bound to by specific dates and timeframes allowing them to structure their waste collections more flexibly and to their waste management needs.

As per the Environment Act 2021 and Food Waste Regulations, businesses that produce more than 5 kg of food waste per week must separate food waste from general waste by the March 31st deadline.

<https://www.reconomy.com/2024/06/14/understanding-defras-simpler-recycling-legislation-for-england/>

Waste will be separated as follows:

Please Note: You only need a minimum of four bins (three if your waste collector chooses to combine paper and card with other dry recyclables), or one multi-stream bin that can collect all applicable waste streams.*

**While paper and card should be separated from other dry recyclables, your waste collector may still collect them together. We recommend speaking to your waste collector to determine which option would be best for your business.*

Who is Affected?

The new legislation directly affects businesses, and non-domestic premises such as schools and hospitals.

For now, only businesses and non-domestic premises with more than ten employees have had to re-jig their recycling practices to align with the government rules.

Micro-firms with ten or fewer employees are set to follow on March 31st, 2027, giving them more time to update and adjust their waste management to the upcoming changes.

Legislation Timeline

To give you more of an overview, we have created a timeline for when collections for specific waste streams will be introduced. This way, you can remain prepared for any upcoming changes that may affect you.

Dry Mixed Recycling (Plastic, Metal and Glass)

- ✓ By 31st March 2025 - Businesses and relevant non-domestic premises
- By 31st March 2027 - micro-firms

Food Waste

- ✓ By 31st March 2025 - Businesses and relevant non-domestic premises
- By 31st March 2027 - micro-firms

Plastic Film

- By 31st March 2027 - Businesses, non domestic premises and micro-firms

Paper and Card

- ✓ By 31st March 2025 - Businesses and relevant non-domestic premises
- By 31st March 2027 - micro-firms

HOW CAN WE HELP SIMPLIFY THINGS?

Upgrading your organisation's waste bins is a crucial step in adapting to Simpler Recycling. You'll need waste solutions that are easy to use, easy to empty, and help facilitate efficient waste separation.

Glasdon Pledge to Reach
Net Zero
 By 2035
 Find out more...

As a Company with a commitment to continuously improving our environmental performance, we are pleased to announce that in 2021 we pledged to reach Net Zero by 2035 (with Scope 1 and 2* to be achieved by 2025).

*The Green House Gas Protocol Corporate Standard classifies a company's GHG emissions into three 'scopes'. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.
