280+ staff in UK, France & USA

B2B Dealing with Government funded sectors and with private and public companies worldwide.

Glasdon Pledge to Reach **Net Zero** By 2035

Net Zero by 2035 (with Scope 1 & 2 to be achieved by 2025).

The Environment is at our Core

We are passionate about our environment and are committed to continuously improving our environmental performance. Our goal is to drive lasting change to improve all of our futures, not only by improving our own processes but by providing our customers with the products to enable them to improve theirs.

Quality by Design

Our mission is to design, manufacture and supply innovative market-leading products that enable our customers to contribute towards a cleaner, safer and more sustainable environment.

Free-Standing Polymer Litter Bins

Our comprehensive range of free-standing polymer litter bins comes in a wide variety of colours. With capacities from 60 to 360 litres, you are guaranteed to find the ideal bin for your needs.

All our polymer litter bins will not chip or rust, are easy to clean and never need painting, giving you an attractive and highly functional waste container for many years.

■ Glasdon Jubilee™ 240 Litter Bin

DESIGN FEATURES

- Houses a standard 240-litre wheelie bin or 300-litre sack (with sack retention).
- Inner wheelie bin can be mechanically lifted to reduce manual handling.
- Recessed lifting handle for safer opening with slam shut action.
- Domed hood.
- Four apertures.
- Anti-flyposting finish.
- Concealed knuckle hinge.
- Decorative banding, litter legend and Bin-it™ symbol in Gold or Silver.

OPTIONAL EXTRAS

- Choice of universal ashtray kit or stubbing plates (Gold or Gun Metal Grey).
- Glasdon FireSafe™ automatic suppression device.
- Sack retention.
- A3 poster frame kit.
- A4 personalisation (supplied as a vinyl sticker).
- Aperture flap kit.
- Aperture blanking panels
- Choice of ground fixing options.
- 240l Wheelie Bin
- REEN smart sensor.

Panelling: Dark Grey.

Recycling variants are available.
Please contact our Sales Office for details.

■ Visage™ Screen System

DESIGN FEATURES

- Two-, three- or four-sided configuration.
- Units can screen 600-, 660-, 770-, 1100- or 1280-litre wheelie bins.
- Low panels provide easy access to open the lid of the wheeled bin behind the screen.
- Vandalex® material frame.
- Extremely robust panelling.
- Bolts for permanent ground fixing into concrete.

Four-sided screen:-

- Front opening door with door stay feature.
- Features a 3-point locking system.
- The door features a nylon handle and stainless steel hinge.
- Adjustable door wheel.

OPTIONAL EXTRAS

- Polycarbonate graphics kit.
- Base skirting.
- Wing lock (four-sided screen only).
- Personalisation.
- Choice of ground fixing options.

MATERIALS

Frame: Aluminium with Vandalex Coating
Panelling: Ecoboard™ material (contains recycled, post-consumer plastic)

SPECIFICATIONS

Contact our sales office for configuration details.

COLOURS

Frame: Silver.
Panelling: Dark Grey.

Personalisation, Optional Extras & Fixing Options Guide

Add a unique touch to your Glasdon order with our Personalisation and Branding Service. From adding your organisation's logo or crest to full graphic wraparounds, we have the in-house expertise to help you achieve the impact you require.

■ Glasdon High-Performance Materials

Glasdon products are manufactured from high-performance materials and undergo stringent quality checks to ensure durability and best value. We have accreditation with ISO 9001:2015, underlining our commitment to provide quality products.

Throughout this brochure, reference is made to the following materials:

Armortec® corrosion-resistant coating is specially formulated to extend the life of Glasdon metal products and components used externally.

Duracore™ material features a tough outer wall of Durapol® material with an internal reinforcing wall of cellular construction, which increases rigidity and offers outstanding performance benefits. Duracore material will not chip or rust, is easy to clean and never needs painting.

Duraplene™ material comprises a range of polymers that have been formulated for internal applications, offering reliability and low maintenance.

Duraplus™ material is a polymer specially engineered to provide enhanced resilience, which gives improved recovery from impact.

Durapol® material is a polymer formulated to withstand extreme temperatures and is impact tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2015 test procedure. Durapol material will not chip or rust, is easy to clean and never needs painting.

Duratec™ material has been specifically created for use in internal environments. In addition to its attractive appearance it offers a blend of toughness, rigidity and dimensional stability.

Ecoboard™ material is manufactured using a combination of virgin polymer and post-consumer plastic waste to create a very robust and strong panel. Ecoboard™ material will not chip or rust, is easy to clean and never needs painting.

Enviropol® material is manufactured predominantly from post-consumer plastics. By balancing these uncontaminated recycled waste materials, the result is a remarkably versatile product with many applications and benefits. Enviropol material will not chip or rust, is easy to clean and never needs painting.

Everwood™ material is a realistic timber grain polymer that requires minimal maintenance. Everwood material is vandal and weather resistant and will not rot, warp or crack.

Vandalex® material is an aluminium alloy engineered to produce a high modulus of elasticity, which offers increased impact absorption properties. Its anodised finish will not rust, is easy to clean and never needs painting.

All Glasdon products manufactured from Durapol® material, Duraplus™ material, Duracore™ material, Enviropol® material, Vandalex® material and Stainless steel can be recycled at the end of their service life.

Personalisation & Branding

Step 1. Choose from a wide range of products and personalisation options including:

Branding, corporate colour schemes, bespoke waste streams, campaign messaging and changeable poster kits.

Our experienced sales team will advise you on the personalisation options of your chosen product.

We can also send you examples of some of our tried and tested visuals for a little inspiration.

Step 2. Selecting Standard Options

Many of our products offer standard graphics and poster kits to choose from at the point of ordering. Simply select the option you require from the drop-down menu on our website, or contact our sales office for more information.

Step 3. Looking for Something Different?

If you would like to change the colours and waste streams of a standard option, include an element of branding, or create something completely unique, we can help. Our Sales team will be happy to learn more about your project and requirements. We will work with you to achieve the finish you require.

Step 4. Free Visualisation Service

Our sales team will then liaise with our in-house graphics team to prepare a visual of the product with your chosen personalisation, of which you're able to review and change if required.

This is a free service offered to all Glasdon customers.

Step 5. Artwork Approval

We are committed to making sure the end result is exactly right for you. When you are completely happy with the visual and have agreed any of the additional production costs, we will finalise and deliver your personalised order.

FIREXPIRE

FIRE SAFETY DEVICE

- STAGE 1**
A burning match is carelessly discarded into a litter bin.
- STAGE 2**
The fire takes hold.
- STAGE 3**
In under a minute, the fire extinguishing plate drops onto the liner.
- STAGE 4**
The fire is contained.

An optional extra on Glasdon hooded litter bins, Firexpire® device is a fire extinguishing plate fitted within the bin top. Should a fire break out inside the bin, a special, replaceable, heat-responsive device releases the plate, which then seals off the mouth of the liner and snuffs out the fire through oxygen starvation. Replacement of the heat-responsive device using a screwdriver resets Firexpire device on site.

Firexpire is an effective, low-cost auxiliary device and must never replace primary fire prevention measures. Obstructions preventing the plate from dropping may adversely affect the function of the unit and, as many Firexpire devices are used in unsupervised locations, regular inspection and immediate replacement of any damaged or distorted components is essential.

■ Glasdon FireSafe™ Device...

...is an automatic fire suppression device fitted within the hood of the bin.

If a fire breaks out inside the bin, the device is activated. Glasdon FireSafe is an effective, low-cost auxiliary device and must never replace primary fire prevention measures.

A regular inspection/maintenance programme should be introduced to check if the device is in working condition or has discharged and needs replacing.

■ LITTER BIN CAPACITIES

The majority of litter bins featured in this catalogue specify two capacities. The 'Bin Volume' is the total capacity the bin liner will hold with the contents measured heaped. The 'Liner Capacity' is the capacity the bin liner will hold with the contents measured flat.

■ REEN SMART SENSOR

REEN is an ultrasonic monitoring device that provides real-time fill level information. This optimises waste collection schedules, cuts costs and reduces CO2 emissions.

■ SITING OF NEXUS 360, MODUS & VISAGE

*For the Nexus 360, Modus and Visage, we recommend that a risk assessment be undertaken to identify an appropriate location for your waste collection units. In order to reduce risk, some organisations decide to place the units a minimum of 5 metres away from buildings. Any potential risk can be further reduced by maintaining a regime of regularly emptying the unit. You may also wish to consider installing a Glasdon FireSafe on the Nexus 360 and Modus.
