Focus on Welsh Waste Regulations

WELSH WASTE REGULATIONS

From 6 April 2024, Wales will introduce new separation and recycling laws for all business, public and third sector premises. This legislation by the Welsh Government mandates businesses to segregate their waste for recycling, marking a significant stride toward achieving zero waste in Wales.

The new regulations will propose three sets of separation requirements in connection with non-domestic premises. In essence, they are aiming for recyclable materials to be further segregated from normal materials in the same way that most householders currently do.

The aim is to change the way recyclable materials are collected and stored within the country and ultimately improve the quality and quantity of how waste is collected and separated. Alongside this, the Welsh Government has set a national target to recycle 70% of its waste by 2025 and eventually become a zero-waste nation by 2050.

FOOD WASTE RECYCLING BINS

Under the new legislation, food waste must be collected and separated for sites producing more than 5kg of food waste each week. Our tailored food waste bins are specifically designed for food preparation and consumption areas. Featuring foot pedals and spacious openings, our bins ensure effortless and sanitary disposal of food waste.

WHEELIE BIN SCREENS & BIN HOUSINGS

These outdoor wheelie bin screens and housing systems are designed for both on-street locations and outdoor recycling centre usage at workplaces, restaurants and bring sites. Our robust screen systems are ideal for hiding unsightly, large-capacity outdoor wheelie bins to create a clear, attractive recycling station.

Recently, we joined in with the Caru Cymru movement to Keep Wales Tidy in the town of Chepstow.

They used our personalisation services to turn words into action and demonstrate their ambitions to protect the environment and their local wildlife. They transformed their Modus unit into a bright and engaging 50/50 waste stream dedicated to capturing both mixed glass and cans & plastic bottles.

Empowering Local Authorities with the Glasdon Jubilee™ Range

Communities are dependent on responsible waste management. As a result, effective waste-capturing solutions are essential. The versatile Glasdon Jubilee™ range offers all the advantages and features that Local Authorities need to optimise their waste management practices and keep their communities clean.

When considering waste disposal, individual locations have varying requirements. Some areas may call for larger bins to accommodate the higher volume, while smaller, more compact options are better suited for narrow town streets.

The range includes sizes ranging from 110ltrs to 240ltrs, with a variety of shapes and styles to suit any environment.

The **NEW Glasdon Jubilee™ Duo 220** is an on-street bin with dual waste-capturing capabilities, where elegant traditional design meets the benefits of contemporary style. Designed to tackle a large presence of waste in areas with high footfall in urban spaces, recreational areas, and high streets, assisting local authorities and operators in more ways than one.

ANNIVERSARY 1959-2024 **65** YEARS

Glasdon Pledge to Reach **Net Zero** By 2035

Find out more...

As a Company with a commitment to continuously improving our environmental performance, we are pleased to announce that in 2021 we pledged to reach Net Zero by 2035 (with Scope 1 and 2* to be achieved by 2025).

*The Green House Gas Protocol Corporate Standard classifies a company's GHG emissions into three 'scopes'. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.
