

## Garrison Housing for **'Mobile Decontamination Facility'**

### Problem Identified

To comply with current Department of Health guidelines, Hospital A&E Departments need to ensure that mobile (air-inflatable) decontamination facilities are stored in a secure, weatherproof, frost-proof housing located externally adjacent to the A&E Department.

The facility is designed to deal with chemical contamination incidents that may result from industrial or transportation accidents, or deliberate terrorist releases.

### The Solution

Mr Jeff Calver, New Works Project Co-ordinator with the Ipswich Hospital NHS Trust, contacted Glasdon and a site meeting was arranged to discuss the most suitable means of storing their mobile decontamination equipment from the varied Glasdon housing range available.

Having understood the exact requirement, the Garrison Modular GRP Housing system was chosen as being the best solution.

### Resulting Benefits

- A storage facility made to the customer's exact requirements for size, colour and layout.
- Weatherproof construction and thermostatically-controlled heating to prevent frost.
- A robust construction which offers a high level of security.
- Suitable ventilation to allow equipment to dry after use.
- Delivered directly to the site as a fully assembled, pre-finished structure, for minimal disruption during installation.
- Made from high-quality modern materials which offer a long life span and keep future maintenance costs to a minimum.

## The Ipswich Hospital NHS Trust

### What the customer says:

Mr Jeff Calver, New Works Project Co-ordinator with The Ipswich Hospital NHS Trust, is very pleased with their Glasdon Garrison Housing and said:

**“The Garrison housing is the ‘best value’ solution available for this application. It has provided the hospital with a high quality storage facility for the decontamination equipment as recommended by Department of Health guidelines. The housing is perfectly located to allow authorised A&E personnel to access the equipment quickly whenever it is required.”**
