PROVISION OF DOG WASTE BINS AT BASHLEY PARK CARAVAN SITE

Bashley Park

Problem Identified

Bashley Park is situated within the beautiful Hampshire countryside, covering 110 acres. The park is picturesque and set within its own private grounds.

Dog waste has been a constant source of concern within the park, not only to paying guests, but also to staff members involved in the clean-up operation, and the owners wanted to eliminate the potential problem of unsightly dog waste littering their site. However, it was appreciated that dogs are quite often valued members of the family unit and, to allow dogs on site, provisions had to be made to both protect the environment in which people relax, and also to help keep the site clean.

Solution

John Beaton, Manager of Bashley Park contacted Glasdon for information on purpose-designed dog waste disposal units. Glasdon offer four different units in a range of sizes and capacities to suit the requirements of all locations.

The Retriever 60 with its large 60 litre capacity was the ideal solution. Purpose-designed, the Retriever 60 incorporates a hygienic flap system and the sealed container offers protection to the user. Retriever 60 is manufactured in tough Durapol® material which is weather and impact-resistant and requires minimal maintenance.

Bashley Park purchased Retriever 60 bins complete with the unique Glasdon Ground-Lock fixing system which is quick and easy to install into soft, unsurfaced ground.

Resulting Benefits

Because Retriever 60 is easy to install, the operators were able to do this without involving costly contractors which saved time and money. The units have been installed around the site providing plenty of opportunity for responsible dog owners to tidy up after their pets.

Mr Beaton is very pleased with the Retriever 60 units which have been purchased. He said...

// The bins are bright and attractive, drawing the attention of dog owners. The flap system provides a close fit when shut and helps prevent the contents from being displayed when in use. It is also nice and easy for those who have to empty them, involving as little contact as possible with the contents. //
