

Glasdon 'Warrior' Gatehouse

FIELD PACKAGING
NEWCASTLE

Problem Identified

Field Packaging in Newcastle-upon-Tyne recently undertook a review of their site and in particular their main entrance. The existing fibreglass gatehouse was evaluated and the decision was taken to replace it to provide a more modern facility and better amenities for the security staff.

The Solution

After initial contact with the Glasdon Sales Office our Area Sales Manager visited the site to discuss the available options. It soon became apparent that the Warrior range would fulfil the key criteria at a sensible cost.

Resulting Benefits

The Warrior range satisfies all of Field Packaging's requirements, the most important of which were:

- *Smart, presentable focal point for their main factory entrance.*
- *Good insulation and internal finish for the comfort of the security staff.*
- *Bespoke configuration to meet the exact needs of the site.*
- *Pre-assembled delivery to minimise on-site disruption during installation.*
- *Fitted out internally with lighting, small power, toilet area and worktops.*
- *Minimal routine maintenance and a long life span.*
- *Can be relocated should site circumstances change in the future.*

WHAT THE CUSTOMER SAYS:

Field Packaging's Project Leader Mr Tom Hoggarth was extremely pleased with their choice of the Warrior System and had the following to say:

“We are delighted with our choice of a Warrior building for our new gatehouse. We were looking for a structure which would enhance the appearance of our factory whilst providing a practical and cost effective solution.

Our security staff are very pleased with the new facilities and level of accommodation and they now have a modern working environment to rival any company.

The decision to purchase a Warrior unit has been a very successful one and should a further application arise we would have no hesitation in choosing a Glasdon Building again.”
